Arizona is a #2 recommended play (1.4 Units)

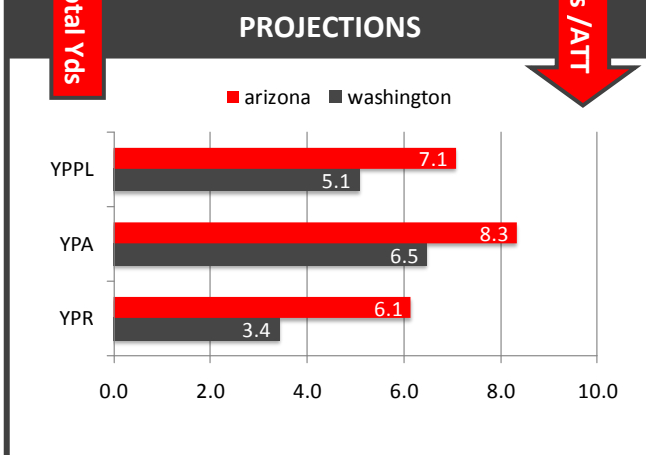

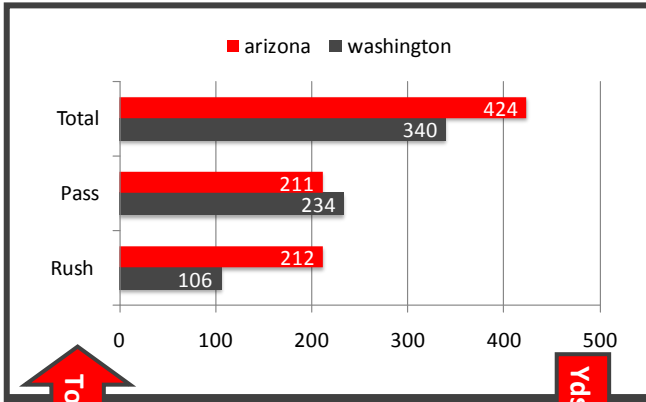

KEY 'S TO THE GAME

÷ Can Wash establish a run game? They've been held to under 100 twice (USC & Stanford) and in each game scored under 20. Arizona is allowing only 3.5 ypr including 4.7 ypppl TY

÷ Can Washington stop Arizona's ground attack? Arizona is now ave 5.4 ypr (+0.7) and Washington is allowing 5.4 ypr (-0.8) for a total advantage of +1.5 ypr

SUMMARY

Arizona projects some huge situational advantages (+1.5 ypr & +1.2 ypppl) and projects an offensive advantage of over 100 yards and 2.0 ypppl. Arizona has a very good Def, and am not sure how Washington can keep this close w/o a running game (which it doesn't appear they will have). Ariz is allowing only 295 ypg (4.7 ypppl) and Wash only projects 4.8 ypppl in this game (326-340 yards). All of our models have striking consistency in Ariz projections (32-35 points and 420-450 yards). Laying only 3, the bet is then can Washington get to 30? Projecting only 320/340 that seems unlikely, none of our models have them over 28 and 80% call for 20-24. **Arizona 34 Washington 21. Arizona is a #2 Recommended play at -3.5.**
